To whom it may concern,

As a long time citizen of Portland I have waited for a long time for the EPA's clean up plan for the Portland harbor. I must say I am very disappointed with your approach.

1. The proposed Monitored Natural Recovery method seems like a cruel joke. You propose to just "watch" ??! We've been doing that for years and years.
2. It feels to me that the EPA is not tough enough on those who actually caused the pollution in the first place. Don't be scared of big money! Hold big business accountable for what they did!
3. I do not like the idea of Confined Disposal Facilities at all. Leaving these toxins right where they are does not make sense to me.
4. Please monitor frequently and establish a website where citizens can read the results as they become available.
5. Thank you for taking citizen comments into account and please do your best. This situation has been a disaster, quite literally, for such a long time. We deserve better.

Thanks,
